*Pilates Reformer

Pilates Reformer classes offer all the benefits of traditional mat Pilates while using a specialized piece of equipment called the reformer. The reformer is a bed-like frame with a flat platform on it, called the carriage, that rolls back and forth on wheels within the frame. The carriage is attached to one end of the reformer by a set of springs. Most Pilates reformer exercises involve pushing or pulling the carriage or holding the carriage steady as it is pulled on by the springs. Exercises can be done lying down, sitting, standing, pulling the straps, pushing the footbar, perched on the footbar, perched on the shoulder blocks, with additional equipment, upside down, sideways, and many other variations. The wide variety of exercises that can be done on the reformer promote strength, flexibility, and balance. These important aspects of fitness lead to better posture, and even potential relief from pain associated with physical imbalances and tension.
